

TYPHOON

MANUFACTURED BY: **TRIOTECH**
2 PLAYER

THIS IS THE PERFECT STORM

Unlike many traditional motion platforms that only reproduce directional movements, Typhoon delivers up to 2 G's of acceleration and up to 400 movements per second. From the bumps and drops of a roller coaster ride to the race downhill or in a cave, this new motion technology with high-tech actuators allows the player to sense it all. And with a large LCD screen and extreme wind effect, you will feel a totally new experience!

Typhoon
