

WATERFULS

MANUFACTURED BY: ICE
2 PLAYER

CLASSIC 80'S FUN BROUGHT TO THE ARCADE!

The goal of Waterfuls is to pump the button to launch the rings through the "Water", trying to successfully land the different colour rings onto the two backlit pegs. The higher the points the more tickets players will win as they play to achieve the bonus. The technology combines a virtual field of play with real-world objects to give the player an unprecedented 3-D gaming experience. This new technology along with the pressure-based pump button help to replicate the iconic 80's game, while being very intuitive to first time players.

WATERFULS

Features

- ✓ Classic kids game
